“Evidence-based nutraceuticals, clinically-tested to help promote joint comfort and flexibility”

Advanced Knee Discovery features a key blend of vitamins and antioxidants to support knee comfort, flexibility and mobility. It is perfect for athletes with knee discomfort looking to improve performance in sporting events, and for individuals of middle to older age looking to significantly improve comfort and quality of life.

Our formulation also features Mangoselect®, a unique fruit extract. Mangosteen is known as the “queen of fruits” and has been used as a traditional medicine in Southeast Asia. It possesses biologically active compounds such as phenolic acids, xanthenes, tannins, and anthocyanins.

Another key addition to our formulation is olive fruit extract. Olive fruit extract contains Hydroxytyrosol, a polyphenol that is well absorbed by humans. Hydroxytyrosol has powerful antioxidant and anti-inflammatory capabilities, helping to promote healthy joint cartilage. Importantly, olives and olive oil are a key source of fat in the healthy Mediterranean diet.

For further information our white paper is available upon request, Advanced Knee Discovery is Halal certified and NON-GMO.
